Data Intake Report

Name: Predict House Prices
Report date: 05/06/2023
Internship Batch: LISUM21
Version: 1.0
Data intake by: Bogdan-Remus Pintilie
Data intake reviewer:
Data storage location: https://github.com/BogdanRemusPintilie/LISUM21-WEEK5/blob/main/price.csv

Tabular data details:

Total number of observations	8
Total number of files	1
Total number of features	4
Base format of the file	.csv
Size of the data	177 bytes

Proposed Approach:

- I assume the data is valid and accurate
- Dealt with null values in the original dataset by choosing reasonable values, this will improve the training process since there are few observations
